News 10 new results for Hydraulic Fracturing

[Not much new in Wyoming fracturing study](#)  
[FuelFix \(blog\)](#)  
 New samples from beneath a Wyoming gas field where the U.S. Environmental Protection Agency linked hydraulic fracturing to groundwater pollution seem unlikely to sway hearts and minds on a nationwide debate over the contentious issue: The additional ...

[Hydraulic fracking will add a radioactive cocktail to your glass of water](#)  
[Golden Gate Xpress](#)

Hydraulic fracturing, also known as fracking, is the process where gallons of water and chemicals are pumped 8,000 feet underground to create something like a mini earthquake. The pressure from the water and chemicals breaks apart rocks and releases ...

'Fracking' uses less water than competition

The Newark Advocate

There has been much concern expressed about the amount of water used in hydraulic fracturing for the recovery of oil, natural gas and natural gas liquids. However, the amount of water withdrawn for electric power generation and irrigation is ...

Diesel in Water Near Fracking Confirms EPA Tests Wyoming Disputes

Businessweek

A retest of water in Pavillion, Wyoming, found evidence of many of the same gases and compounds the Environmental Protection Agency used to link contamination there to hydraulic fracturing, the first finding of that kind. A U.S. Geological Survey ...

Support slips for more rules as gas-frackers campaign

Houston Chronicle (blog)

Public support has cooled for stricter environmental regulation of hydraulic fracturing for natural gas, a drilling method that has lowered U.S. energy prices while raising concerns over its impact on drinking water. Fifty-six percent of Americans said ...
